

## Sprint 1 Report

Product: Athena

Team Athena

Date: 4/19/22

### **Actions to stop doing:**

The team should stop working on the onboarding screens since it is pretty much done. The team should stop holding meetings too late in the evenings since no one likes evening meetings. The team should stop working on the minute design details like spacing and colors since this is secondary to functionality and can always be fixed in later sprints.

### **Actions to start doing:**

The team should schedule more in-person group work sessions, since these are effective at quickly answering questions and getting work done.

### **Actions to keep doing:**

The team should keep pair-programming. The team should keep up with the short SCRUM meetings to quickly update everyone on what's going on. The team should continue communicating with each other about meeting changes, work to be done, questions that have come up, etc.

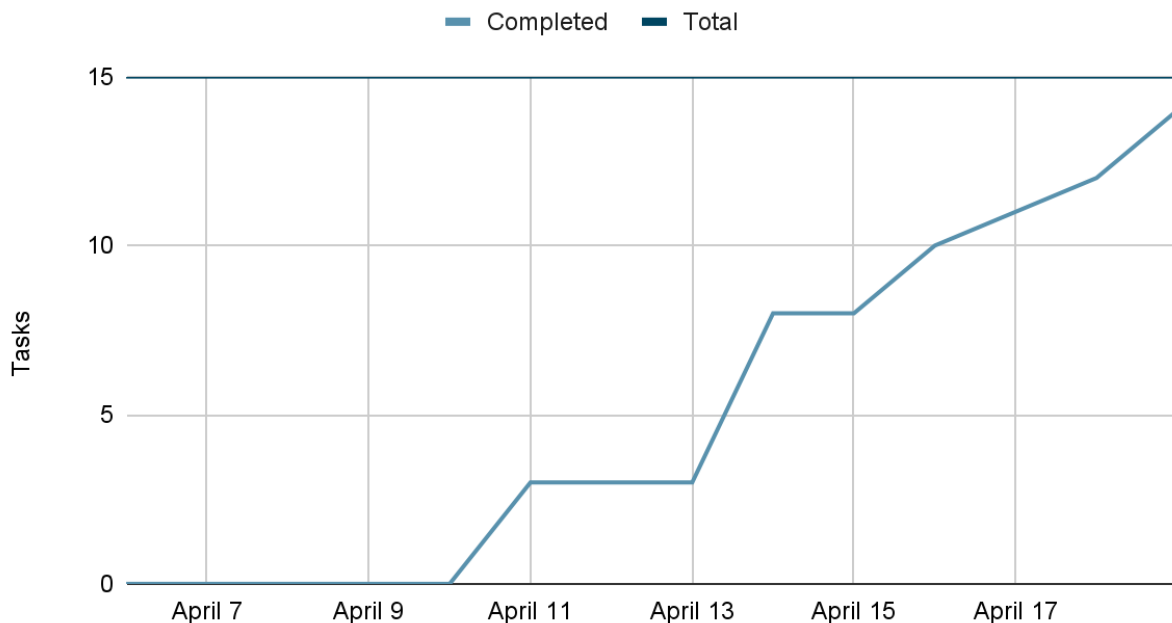

### **Work completed/not completed:**

All user stories were completed.

### Work completion rate:

- Total number of user stories completed during the prior sprint:
  - All of them (5)
- Total number of estimated ideal work hours completed during the prior sprint:
  - Sai: 8.5 hours
  - Nitya: 11 hours
  - Logan: 8 HR
  - Leejin: 11 hrs
  - Kevin: 8h
- Total number of days during the prior sprint:
  - 11 days
- For the previous sprint, the user stories/day and ideal work hours/day figures should be reported.
  - User Stories / Day =  $5 / 11 = 0.45$
  - Work Hours / Day =  $46.5 / 11 = 4.227$

### Athena Sprint 1 Burn Up Chart

User Stores

User Story 1

As a user, I want creating an account to be easy and simple, so that I know what actions to perform after onboarding.

User Story 2

As a user, I want to create a profile on Athena, so that I can access my data from anywhere.

User Story 3

As a user, I want to be able to find a book, so that I can keep track of it.

User Story 4

As a product owner, I want to be able to see user analytics, so that I can better improve my product.

User Story 5

As a user, I want to be able to view all the books I'm reading, so that I can quickly update my progress on it
