

Working Prototype Known Problems Report

Product: Athena

Team Athena

Revision Number: 1

Revision Date: 5/30/22

List of functions not working correctly:

1. Mark as Completed
 - a. Action: Marking a book as read automatically dismisses the screen
 - b. Location: Might have to do with how Firebase Firestore is listening to changes and so by doing that, it dismisses the screen since it is deleted from that collection from reading or wishlist to already read.
 - c. Action: Inject standalone book to DetailScreen without
2. Edit Name
 - a. Action: Tapping on the Edit Name setting displays the alert in all black
 - b. Location: Might have to do with the AlertKit package and how it detects we are in dark mode
 - c. Action: Build custom text field alert for SwiftUI
3. Edit Email
 - a. Action: Tapping on the Edit Email setting displays the alert in all black
 - b. Location: Might have to do with the AlertKit package and how it detects we are in dark mode
 - c. Action: Build custom text field alert for SwiftUI

List of User Stories for Project Review:

1. As a user, I want creating an account to be easy and simple, so that I know what actions to perform after onboarding.
2. As a user, I want to be able to find a book, so that I can keep track of it
3. As a user, I want to be able to view all the books I'm reading, so that I can quickly update my progress on it
4. As a user I want to see how much of the book I have left to read so I can keep track of my progress.
5. As a user, I want to be able to add my own notes so that I have a record of everything in one place.

6. As a user I want to be able to search through the notes I've written so that I can quickly find what I'm looking for.
7. As a user I want to be able to sort the books I have read (or yet to read etc) by ranking, release date, author, etc., so that I can access books easily.
